The logo for SpectraView features the word "Spectra" in a light blue, sans-serif font and "View" in a larger, bold, light blue font. A stylized blue wave graphic, resembling a spectrum or a signal, curves around the text. A red triangle is positioned at the peak of the wave, pointing upwards. The entire logo is set against a black rectangular background with a white border.

FUEL OIL

Chief Energy's Heating Oil Program has been a great way for households and businesses to save money. We work for our customers, not windfall profits. We use our buying power to negotiate better prices with local oil companies without sacrificing quality or service for our customers. We offer our customers the lowest price per gallon from each of our supply partners. Chief Energy also offers monthly variable rates in addition and can give customers the opportunity to lock in prices when the conditions benefit our customers.

NATURAL GAS

Chief Energy purchases and transports your natural gas requirements for delivery to the utility city gate. The utility then uses its existing gas lines to transport the gas to your facility. Chief Energy can do this at a lower cost than your utility and pass the savings onto you. Our in-house pricing analyst reviews the market fluctuations daily and adjust the pricing accordingly. We work hard to ensure that our pricing is one of the most competitive in the industry. We can offer several pricing plans to fit you every need.

ELECTRICITY

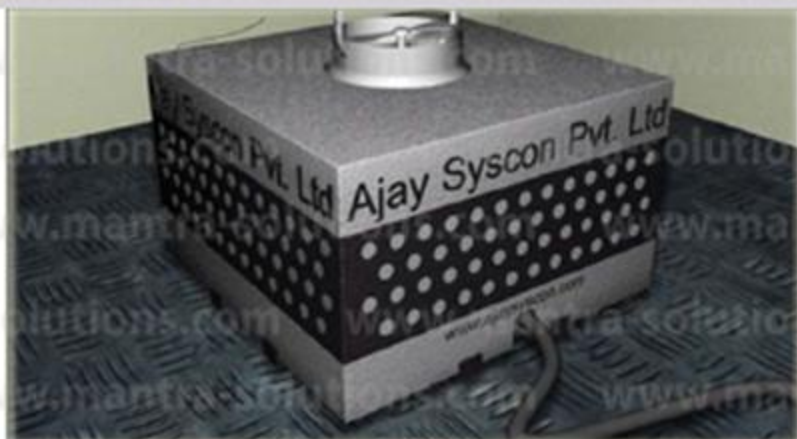

Diversed Rate: If you elect this program for your electricity supply, your monthly rate will be a mixture of fixed & variable priced energy. This program provides the best of both worlds, giving you some price stability by partially locking into a fixed rate, but positioning you to take advantage of any downswings in the market. The agreement is on month-to-month basis. **Fixed Rate:** If you elect this program for your electricity supply, your monthly rate will be locked into a fixed rate for the year. This option requires a 12-month commitment.

About Moi

In the beginning...

Julie Edelman grew up in a traditional household with a domestically-dutiful stay-at-home mother. Julie studied at both Duke and Oxford Universities and then hit the working world without a dust mop in sight. Julie's drive and passion saw her rise rapidly to senior executive positions in the worlds of marketing, advertising, finance and entertainment, and allowed her to hone her entrepreneurial and creative skills.

Along the way, Julie strode down the marriage aisle, and the early warning signs of an unexpected role as an "Accidental Housewife" emerged with weekly trips to the Laundromat and sitting on toilet seats left up. But, without breaking her stride or a nail, Julie continued to pursue her career and plans for starting a family... and clouds began to gather. "It was like the perfect storm. Before my son was born, I found that marriage was pretty much the same as being single – except you've got a new ring or two your wearing. But once Luke came along I suddenly found myself juggling my career, home, and family. Instead of doing lunch, I was doing dishes and diapers. And, I quickly realized that suddenly without warning I'd become 'The Accidental Housewife.'"

Embracing the Accidental, all you need is Glove!

After the shock wore off, Julie knew she had to embrace her fears, disinterest and housewifely imperfections. "I realized I had to come clean and come out of my broom closet. I loved my family and wanted to maintain a nice home, but I wasn't happy trying to be the perfect wife and mother, and pretending I had it all under control." This catharsis led her to discover and share with a sense of humor, simple, real life shortcuts that would allow her and fellow accidental housewives to get it all done in a way that suited
